Dear fellow EV owner,

Town of Ridgway, EcoAction Partners, CLEER, and SMPA are hosting an EV Ride and Drive on September 16, 2023, at the Ridgway Town Park from 10 am - 2 pm. An EV Ride and Drive is a community event where attendees can learn about electric vehicles, their charging infrastructure, the benefits of driving electric, and available incentives to adopt them. Plus, they can check out a variety of EVs, ask questions to their owners, and test drive EVs (many times for the first time in their life).

We’d love for you to participate in this event by showcasing your EV and telling your experience to our community. People are curious about EVs and eager to learn from their neighbors! It’s not necessary for you to allow people to ride or drive your car, there will be EVs from dealerships for test drives.

Can we count on you for this event?
